LIST OF BOOKS INDEXED

LIST OF BOOKS INDEXED

The list, arranged in one alphabet, includes both works by various authors and works by individual authors. As a rule, only a main entry is given for each work included in this list but, in some cases of questionable entry, title or editor references are made. For a collection of essays published in honor of a particular individual, a reference is made from the name of the person honored to the main entry, which is usually a title entry. Generally, only American publishers are given. The English publisher is given when the book in question is obtainable only in an English edition. Paging is given for out of print books, as a convenience in identifying editions.
